Manny is an artist.

He is a wealth of information, cares for his customers and has a talented crew working with him.

I called about water damage to my maple floor, turns out it is red oak. Manny and his crew removed the bad section, double checked for sub floor leaks, and replaced with identical wood. They sanded and prepped / sealed the entire area and now you cannot tell the new from the old.

Clearly, Manny is an expert and engages with his customers as he works. It was amazing watching the team, asking nosy questions, and learning more about wood floors than I ever imagined.

I was very curious as to the process and Manny's assessment of the initial cause of the damage matched my insurance adjusters claim.

Manny is now the company I recommend to all my friends.

Rhonda
